

**JACK
WILLS**

**TOTAL SAVINGS
£244,414**

BACKGROUND

Commercial Energy Solutions (CES) saved Jack Wills Ltd £244,414 from 2009 to 2015 through procurement, invoice validation rebates, energy efficiency programme and capacity management.

OUR SOLUTION

- Achieve cost savings and implement energy cost control measures going forward.
- Validate utility invoices, resolve billing disputes, improve asset and consumption data management and raise high consumption alerts.
- Ensure compliance with the ESOS or any other encompassing Environment Agency schemes

OUTCOME

Through intensive data gathering and cleansing, we have identified several metering issues where our client was paying utility charges for other tenants or vacated premises. By centralizing supplier billing system into one multisite invoice we have delivered cost and resource efficiencies. As industry specialists we understood the benefits of a wellstructured and managed energy portfolio when purchasing energy. We actively monitor energy markets so we were able to point most favourable entry points for booking supply contracts.
